How do I maintain my Eyelash Extensions?

In order to protect and maintain your Eyelash Extensions, I recommend clients use the products available at **BeautiLicious Lash Studio** to protect their investment and maintain their Eyelash Extensions.

I believe my Eyelash Extensions were improperly applied at a different salon; can BeautiLicious Lash Studio repair my Eyelash Extensions?

BeautiLicious Lash Studio provides a comprehensive complimentary consultation to all individuals who wish to have previous applications removed or corrected. **BeautiLicious Lash Studio** will be able to advise you with the safest method of removal or application.

Can I apply mascara after receiving my Eyelash Extensions?

Eyelash Extensions virtually eliminate the need for mascara. Although most clients feel they do not need to wear mascara you may find that you want to add additional length or volume for special occasions. **BeautiLicious Lash Studio** recommends only using mascara sold in the studio that is compatible with your eyelash extensions to ensure your Eyelash Extensions last as long as possible.

Can I apply eye makeup while wearing Eyelash Extensions?

Yes, however, cosmetic products that you apply to your Eyelash Extensions should be water-based and oil-free.

Will Eyelash Extensions interfere with my natural lash growth or damage my natural lashes?

The Eyelash Extension application is a non-invasive procedure that is safe and painless for your natural lashes. When applied properly by a Certified Lash Stylist your Eyelash Extensions can last safely and indefinitely with regular re-lash applications.

Natural eyelashes grow in and fall out in cycles, every 60 – 90 days. When a natural lash matures and sheds, a new lash will grow and quickly replaces it. Most people seldom notice when their natural lashes shed.

When eyelashes are extended with Eyelash Extensions, you may notice your lashes shedding because they are longer, thicker and darker than your natural lashes. Keep in mind this is perfectly normal occurrence, with or without extensions.

BeautiLicious Lash Studio will apply Eyelash Extensions primarily to those lashes that are in the middle of their maturation cycle to maximize the amount of time they will be in place before shedding. Eyelash Extensions will shed with the natural lash when it reaches the end of its growth cycle. You may notice a few Eyelash Extensions shedding within the first week after your application because they are attached to a natural lash that is at the end of its growth cycle.

Is the application of Eyelash Extensions painful?

No, the application of Eyelash Extensions is a non-invasive, relaxing, luxurious, and a painless procedure. During and after the Eyelash Extension application, you should not experience any pain or discomfort
